BE BIKE FRIENDLY

RESPECT THE LANDSCAPES
Be a good steward of the physical environment.

SHARE THE TRAIL

Most of the trails we ride are multi-use. *Be nice. Say...*

RIDE OPEN AND LEGAL TRAILS
Pay attention of dedicated signals for bikers.

PLAN AHEAD
Be prepared and self-sufficient. Don't ride solo.

MIND THE ANIMALS

When it comes to wildlife, live and let live.

STS

SINGLE TRACK SCALE
The difficulty ratings

S0 Describes a single trail without any particular difficulties. Even without any particular MTB technique trails with S0 can be managed.

S1 Includes smaller obstacles such as flat roots and small stones. On an S1 trail basic MTB technique and constant attention will be required.

S2 Trails contain larger roots and stones. The surface is frequently loose. The obstacles require body displacement to be successfully ridden.

S3 Higher steps, hairpin turns and tricky traverses. Exacting breaking and a very good sense of balance is required.

S4 Describes very steep or extremely steep slopes, trail techniques such as being able to shift the front and back wheels is required.

S5 Erosion, extremely tight curves, multiple obstacles. Some obstacles have to be jumped over.
